

36x24T

S0

SH

This is a vintage 1950's olmo frame as per the components which were on it & my research. This have an olmo headset, olmo seat collar and a Shimano botttom bracket (newer to the frame). Serial number is 315. This shows moderate to heavy signs of cosmetic wear.

Here are the frame measurements which are taken by me and there might be a small margin of error because of this.

56cm c-c seat tube

55.5cm - top tube

14cm - head tube
