

What model Olmo is this?

Any ideas? I have seen two other photos of this same frame/fork model on Flickr, but, no description. It has the most gorgeous bone-white pearl paint, minus where the previous owner slapped white paint on the chips and a water bottle braze repair.

It has panto chrome fork, chromed lower chainstays (best chrome I've ever seen), a braze on front DR and a brazed nipple for a tire pump on the headtube. Serial number on bottom is: 56-4508. I cannot for the life of me find hide nor hair about what model this is on the net. She has Olmo drops and an Olmo BB. She will be a beaut when all done.

Cheers for any help.
