Dear Peter,

I just discovered your fantastic Olmo serial number registry project, and wanted to thank you for your efforts. It is simply awesome.

I have looked throughout your registry and unfortunately have not been able to find a match to my newly purchased Olmo, which has a serial number of (I think): 53 7374. I was told it's an ~1980 bike, in part based on the SpA identifier.

I've attached some pictures - are these of help to you in your project, and do you have any insights you can kindly share on the model and year of my bike?

Additionally, if I can kindly ask: I believe it's been repainted. Have you ever seen an Olmo with the color scheme of my bike?

Best Regards,

Marko.

Many thanks Peter.

Based on your guidance:

- single digit on crank arms is 1 (in a circle)
- 2 digit year code on the derailleur is 81
- unknown

I therefore can assume it's likely a 1981?

Best Regards,

Marko.

Yes... or 1982 at the outside.

I would say it's 1981.

Peter
