

Bike measures 22" top tube C to C
23" seat tube C to C

Was blue at some point but most of the paint is gone. Chrome is in beautiful shape and will shine up nice with some attention. Head badge has beautiful patina.

Original parts include frame and fork
Campy shifters, FD, headset, all cable guides and holders, seat post, HF hubs
Magistroni BB and crankset
Ambrosia stem and bars
MaFac brakes and levers

Non-original parts
Galli RD and different chain
Different brake pads
Hubs were mounter to different rims, will likely need to be redone
Saddle
105 pedals with toe clips

I had every intention of fixing this up but I just don't have the skills yet to take this on. It would be amazing brought back to life.

Price is 500\$ and that includes shipping to CONUS only. Campy bits alone could fetch that but I don't wanna chop this up if someone will do her right.
