REV. CAMPAGNOLO

REV. CAMPAGNOLO

A close-up photograph of a vintage motorcycle carburetor. The main body is made of polished aluminum. On the upper left side, the text "PAT. 80" is stamped into the metal. Below this, there is a small adjustment screw with a spring. In the center, there is a circular air filter element with a ribbed outer edge and a hexagonal opening in the middle. To the right, there is a large, curved metal component, possibly a float valve or choke lever, which is also polished. The background is a blurred wooden surface.
