Peter,  
I am building up a frame I bought off ebay so no original parts unfortunately.

Thought you might find this interesting. My frame is 5947 and another 56cm is 5968. Very close in build sequence to mine.

I am building up the frame now and will take all of the necessary photos.

I used your registry and an ad from Bicycling June 1982 showing an Olmo Competition with a full sloping fork crown. So mine is before that but after 1978.

-Scott
