BREV.

CAMPAGNOLO

Offered for sale is a circa 1960 Olmo Tipo Rondine road bicycle frameset. The frame has a 58 cm seat tube (c-t-c), or 59.5 cm center to bottom of seat post clamp, or 61 cm to top of seat clamp. It has a 56 cm top tube c-t-c. Frame material is steel. It has Campagnolo dropouts front and rear, 120 mm rear spacing and seat tube size is 26.2 mm. One rear dropout has the open C stamping, the other doesn't, so must have been close to 1960. The serial number is D501. The online dating registry puts this frame at about 1958. The frame comes with the original Magistroni Senior bottom bracket (in good condition). I took off the adjustable cup to clean it and take a look inside the bottom bracket shell (looks good, don't see any rust). Also the Olmo headset and seat post clamp. The red paint has faded more in some parts than others. The chrome is shiny but pitted, more in some areas. The decals are mostly intact and the head badge is nice. Overall, this still a charming frame and will be a nice rider. I don't see any dents and not crash damaged. The chrome could use some careful polishing to look nicer. This will be a great project.
