

For sale is a used c.1960 Olmo Professional frameset. The serial number is D514. It has a 58cm seat tube c-t-c (60 to top), and a 56cm top tube c-t-c. It has Campagnolo dropouts front and rear (rear with earlier open C stamping). It is in used condition with faded paint and decals. The decals are still very cool. The chrome is shiny, in good condition, not great, with pitting and oxidation. It comes with the original Olmo headset, seat post collar, Magistoni bottom bracket, and Campagnolo dropout screws. Overall, it is still a cool old racer. It rides great. There are no visible dings or dents. There are some marks near the head tube that might indicate a crash but the frame is not damaged, no rippling of the tubes, and the forks are not bent. There are some photos of the area. It rides straight. It is still very presentable.
